## Clinical Indications for Admission to Recovery Facility

[Return to top of Asthma - RFC](#)

- Skilled nursing facility (SNF) or subacute facility care is/was needed for appropriate care of patient because of **ALL** of the following:
  - There are no acute hospital care needs.(1)
  - The patient has [Intense and complex care needs](#) that make recovery facility care safer and more practical than attempting care at a lower level and **ALL** of the following<sup>[A][B](4)</sup>:
    - These care needs include the multiple components of care that are delivered by skilled professionals at a recovery facility.<sup>[C][D][E]</sup>
    - There is a plan to provide **ALL** of the following<sup>(14)</sup>:
      - Care plan management and evaluation to meet patient needs, achieve treatment goals, and ensure medical safety<sup>(15)</sup>
      - Observation and assessment of patient's changing condition to evaluate need for treatment modification or for additional procedures until condition stabilized
      - Education services to teach patient self-maintenance or to teach caregiver patient care<sup>(16)(17)</sup>
      - [Skilled care](#) treatments daily (or more frequent), including **1 or more** of the following:
        - Nursing treatments needed for **1 or more** of the following<sup>(18)</sup>:
          - Intravenous (IV) infusion, IV injection, or intramuscular (IM) injection<sup>(1)(16)</sup>
          - Oxygen administration, starting or managing changes<sup>(19)(20)</sup>
          - Patient care training and assistance for **1 or more** of the following<sup>(21)</sup>:
            - Exercise program (eg, range of motion, pulmonary, cardiac)<sup>(22)</sup>
            - Safe performance of ADL (eg, dressing, communicating, eating)
        - Rehabilitation therapy treatments (PT, OT, or SLP) needed for **1 or more** of the following<sup>[F](18)(24)</sup>:
          - Ongoing assessment of rehabilitation needs and potential (eg, range of motion, strength, balance)
          - Supervision of therapeutic exercises or activities to ensure patient safety and treatment effectiveness
          - Gait evaluation and training
